

Breakthroughs and Shifting Tides Pay Attention to the Omens of Great Change Ahead Feb 9-15, 2019

This Week's General Astrology Forecast

The week starts off with the Moon in Aries and Mercury Sextile to Uranus. There can be a sudden breakthrough opening for you.

Lively communications and making unusual connections are quite possible. Not a day to

just be sitting around relaxing with such feisty energies at play.

The week may bring omens of great change for you. Pay attention to the currents as the tide may be shifting suddenly. Lots of change just ahead.

BEST MONEY DAYS this week are the 10th, 11th,* and 15th.

Best Money Days are days when the collective celestial events bring greater than usual opportunities. This may not translate into direct and immediate cash in your pocket, but potential for increase in your future prospects. Of course when these days are talking harmoniously with your personal stars the increase multiplies exponentially.

Find out more in today's Astro Energy Report (AER).

Be sure to check out the **Best Essential Oils to use this week**, **Void of Course Moon Phases** and **Meaning of the 12 Houses** and **degrees** (below). Looking up what house planets are activated helps you have greater insight about where things are happening in your life and how they may affect you.

WORLD CLOCK TIME ZONE CONVERTER find out what time celestial events are happening in your part of the world.

BEST ESSENTIAL OILS

Best oils to use this week are those that help you stay mentally alert, yet relaxed and calm. Oils that support meditation are excellent. Generally frankincense and the wood oils are good for stabilizing the mind.

I recommend the essential oil:

Frankincense (Boswellia carterii) and frereana) -

Aromas: Warm, sweet, balsamic, resinous, woody, exotic and sensual

- A 'Holy' oil from ancient time when thought more valuable than gold.
- Promotes integrity with Self.
- Spiritual and emotional support.
- Helpful aid for meditative and spiritual practices.
- Natural Analgesic pain reliever.
- An immune stimulant.
- Helpful for building stamina.
- May be useful for treating breathing issues.
- Promotes regeneration of skin cell tissue.

Astro Energy Report Highlights

All dates are at exact peak of intensity when energies begin to culminate and wane. You may actually feel the energies several hours or even days or weeks (in the case of eclipses) before the Celestial Peak, Crest of the Wave, so to speak. If you have personal planets or points within 1-2° orb of an aspect that's occurring between planets then you will feel that celestial event more strongly.

February 9th - Mercury at 29° Aquarius Sextiles Uranus in Aries. There may be a last minute opportunity available for you. The late degrees always signify some final stitch that can be made to finish things up.

February 10th - Mercury ingresses into the sign of Pisces for almost two months until the 16th of April. Mercury begins to slow down the last week of this month preparing for his Retrograde Station on March 5th at 29° 36' of Pisces. The late 29° placement in Pisces omens a finishing of a cycle of communications in the area of your life where Pisces is located.

The watery depths can conduct and amplify Mercury's mercurial charge. If there's confusion then Neptune/Piscean energy can amplify that confusion. Meditation, dance, writing, music and dreaming are all favored when Mercury is in Pisces. The usual structure of your thoughts is missing. When Mercury Stations Retrograde this loss of structure may become more noticeable. Your imaginative faculties are greatly amplified over the next two months.

Mercury crosses into his Retrograde Shadow at the Pisces Full Moon on February 19th when he is Sextile to Saturn in Capricorn. Pay attention at the Pisces Full Moon to what is transpiring as this can indicate any issues that may surface during Mercury's Retrograde. As well as, any opportunities that may come after the Retrograde cycle is over.

February 12th - First Quarter Waxing Moon at 23° 55' of Taurus. The Taurus Moon is Trine to Saturn and Pluto in Capricorn. Squares are always release points. What you're called to release now has beneficial outcomes for you emotionally. The Trine to Saturn and Pluto imbues the Moon (representing your emotional body and attachments) with Structure, Power and Stability.

On this same day - Mars at 29° Aries Conjuncts Uranus. This conjunction adds tremendous energy and action to the release that's activated today. At 29° there's a finality and feeling of completion that can come. The 29° can pack more intensity because it's the final stitch to complete what's been under reconstruction for the past 8 years in this area of your life. Uranus will exit Aries (not to return for 84 years) on March 5th (at time of New Moon in Pisces on March 6th) and enter the sign of Taurus. Uranus will be

sitting at 0° Taurus until the 27th of March, coinciding with Mercury Retrograde. Marking this as a very intense period of time for everyone when tremendous change is afoot.

February 14th - Mars enters the Sign of Taurus until March 30th. Mars energizes the earthy energies of Taurus which are quite distinctly the opposite in many ways to Taurus's laid back, relaxed style and way of being. You'll probably be getting much more started than usual and completed (hopefully) in the area of your life where Taurus is located. Martian energy is great at starting things, but not always so good with follow-up and completion.

Depending upon the balance of Fire and Earth Elements in your chart active during this time, your fire energy for action could feel a bit snuffed out by all the earth. Or, you can feel a little irritated or aggravated by circumstances that pressure you to act when you'd rather go slow and take your time about it.

VOID OF COURSE MOON PERIODS

The moon represents your emotional needs. Your emotions fluctuate with the moon as it moves through its 28-day cycle around the zodiac from new moon to full and back to new. Notice how the moon's placement in the zodiac affects your mood and emotions. Essential oils can help stabilize your mind and emotions. Generally earthy scents have the most harmonizing and stabilizing effect on the emotions.

Void of Course Moon periods are great for taking it easy and going with the flow of events and completing projects. During Void of Course Moons your emotional body is going through a period of processing and integrating your recent experiences. You naturally clear out your emotions during these periods. Doing things that helps with this natural process are especially helpful now, i.e. relaxation, yoga, movement, hot baths with sea salts and essential oils, focused breathing.

Void of Course Moon Phases are not good for starting new projects, or launching new ventures, or having meetings (if you want to achieve anything), or signing contracts and making agreements as it's less likely anything will come of any agreement, or it will be sluggish and slow to start.

For your New and Full Moon Rituals make sure the Moon is not Void of Course and in aspect to another celestial body when doing your new and full moon rituals for best results.

1. February 10th we have a 1+ hour Void of Course Moon from 3:48pm PT to 5:28pm PT when the Aries Moon enters the sign of Taurus.
2. February 12th we have a 11+ hour Void of Course Moon from 2:26pm PT until 1:32am PT on February 13th when the Taurus Moon enters the sign of Gemini.
3. February 15th we have a 1+ hour Void of Course Moon from 4:48am PT to 6:03am PT when the Gemini Moon enters the sign of Cancer.

MEANING OF THE 12 HOUSES

Look to where a planet is located in your own astrology chart to find out what area of your life things are happening. **Get a FREE chart** at Astrodienst (no material association).

If you don't know what area a planet is located in your natal chart look to find what house it rules for insights about how it might affect you.

GENERALLY the degrees in each house represent the following:

1-9° Formative Development
10-19° Integration life lessons
20-29° Lessons in Mastery

1st house (ruled by Aries/Mars) – physical persona, personality, how others see you
1-9° Physical Body

10-19° Self
20-29 ° Early Environment
